Improvement Plan

<u>Thematic window</u>: Children, Food Security & Nutrition

<u>Programme Title</u>: National Nutrition Programme/MDG-F Joint Programme

c) File for the Joint Programme Improvement Plan

After the interim evaluation is complete, the phase of incorporating its recommendations shall begin. This file is to be used as the basis for establishing an improvement plan for the joint programme, which will bring together all the recommendations, actions to be carried out by programme management.

Evaluation Recommendation No. 1 The JP should expand to all JP Woredas the practice of providing discharge rations to SAM children after treatment before their next screening. Response from the Joint Programme Management Response from the Joint Programme Management These two woredas are outside the TSF intervention area where there is no system to implement the discharge rationTo expand to these 2 woredas, would require additional funds to create the whole structure including the establishment of food distribution centres as well as training food distribution agents. The current budget does not allow for this extra cost. At the moment WFP provides the full TSF support to the already existing intervention woredas using a different source of funding for SAM cases referred from Health Posts.
