2.1 WHO is currently negotiating the revised implementation strategy with MOH that includes a self monitoring mechanism.	nber JP, V and	sponsible WHO Team	Comm	ients	Done Status	Comments	Status

Develop with relevant stakeholders a "roadmap" for implementing WSPs throughout Jordan. This roadmap should include an implementation strategy and its implication in term of legislation, policy and institutional needs. **Response from the Joint Programme Management** Further to the communication with the Mid-Term Evaluator during his mission and to revive awareness to the road map document, The following need to be emphasized: The road map/roads to vision has been existing since 2005. It has been jointly developed by the Ministry of Health (MOH), The Ministry of Water and Irrigation (MWI), and the water companies over 3day period consultations in WHO CEHA offices. WHO CEHA role was a facilitator to the roadmap development process. The roadmap has also been communicated on an inter-ministerial level between MOH and MWI (attached) in preparation for the first demonstration Water Safety Plan (WSP) in Wadi Assir. The Joint Programme (JP) was designed based up on the roadmap. Therefore, the JP, particularly output 1.1, was designed to meet each of the ítems mentioned in the roadmap and each item/ phase in the roads to vision document correspond to an activity in the aforementioned output of the JP as demonstrated in the attached document of Roads to Vision. Thus, the JP closely contributes to the achievement of the national vision and paves the way for scaling-up of the WSPs in Jordan as demonstrated in the attached Roads to Vision document. Finally, WHO is prepared to hold a session to explain, in detail, the process of developing the roadmap by the MOH, MWI and water companies, if further clarification is needed. However, it is beyond the scope of the JP to implement or replicate WSPs throughout Jordan. **Key actions Time frame Person** Follow-up **Secretariat** responsible **Comments Status** WHO IP Team 3.1 Revive December Done **Comments Status** awareness of 2010 and concerned Q1/2011 stakeholders to Q3, 2011 the approved "roads to vision"

- 8. The piloting exercise and activities of the JP different outputs will be carried out jointly. This will be an intervention that will be felt by the local communities and can be replicated in many other locations and regions. The JP is now negotiating with different stake holders to create a management body for this piloting exercise from the local communities.
- 9. A roadmap for preventative water safety management exists since 2005 to cater for the wide range of developmental steps that are needed to incrementally and sustainably introduce Water Safety Planning in the country (based on our already well-established knowledge of Jordan specificities). Output 1.1 of the JP closely contributes to the achievement of the national vision and paves the way for scaling-up of the WSPs in Jordan as demonstrated in the attached roads to vision document. However, it is beyond the scope of the JP to implement or replicate WSPs throughout Jordan.
- 10. In response to the evaluation recommendations to strengthen sustainability, WHO is negotiating with the Ministry of Health a revised implementation strategy whereby the Ministry of Health will assume the full responsibility and leadership- with technical suppor from WHO- of the JP components with the aim of internalizing the processes, results and outputs within the existing programmes of the Ministry of Health towards developing Jordan's strategy and plan of action for protecting health from climate change fulfilling Jordan's commitment to the WHO Regional Committee resolution on health and climate change.

i. The Joint D	n ogi amme nas	an cauv carried of	u meeumgs with a	merent		
		nd discussed initia				

- initiatives for adaptation to climate change. 2. The JP is coordinating with the governererate authorities to formulate a task force from the ZRB area to be responsible for the implementation of the piloting activities in the ZRB. 3. The JP will carry out a major workshop on climate change issues, impacts, adaptation, etc. on the ZRB involving stakeholders to modify the interventions and workplans if needed
- 4. Output 2.4 will pilot tools that will support the implementation of WSPs by WHO. No one UN agency is working in isolation of the other agencies; their activities and results complement one another

Key actions	Time frame	Person	Follow	-up	Secret	ariat
		responsible	Comments	Status		
11.1 form the ZRB task force from main stakeholders to monitor and evaluate performance in the basin.	Q4, 2010	JPC, MoEnv, Zarqa Governorate,		Done	Comments	Status
11.2 carry out Conduct regular coordination meetings with the TF and major stakeholders for monitoring and evaluation of the work done in the basin. Evaluation Recomm	Quarterly	JP team, MoEnv, Zarqa Governerate		Done		

Work in close collaboration with IUCN; particularly for activities to be implemented in the ZRB. They should be included in the Working Group recommended to oversee activities in the ZRB and the JP should use IUCN expertise in the region.

Response from the Joint Programme Management

The JP has been working with IUCN right from the beginning since they are a partner in the Spanish governemt funded project on the Zagra River rehabilitation at the MoEnv. Many meeting were held with them where they provided the IP with their publications on the area. The IP is now discussing with IUCN their role in the JP piloting interventions in the Zarqa river basin.

Key actions	Time frame	Person	Follow	/-up	Secretariat	
		responsible	Comments	Status		
12.1 IUCN is included in the ZRB Task force.	Q4, 2010	JPC, CTAs		Done	Comments	Status
12.2 Discuss with IUCN their role in the piloting programme	Q4, 2010	JPC, CTAs		Done		
12.3 Coordinate with IUCN on the awareness and capacity	Q4, 2010 and 2011	JPC, CTAs		Done
